Software Engineer with a BSc (Hons) in Computing and Information Systems and 1 year 5 months of professional experience as a WordPress Developer at Proitzen. Skilled in full-stack development with the MERN stack and mobile development with React Native, with hands-on experience delivering production WordPress solutions. Undergraduate thesis research in AI safety, focused on adversarial jailbreak benchmarking of large language models, with a research abstract submitted to two international conferences and a Best Presenter award. Strong problem-solving, multitasking, and collaborative skills, with a track record of adapting quickly to new technologies.

WORK EXPERIENCE

Software Developer (WordPress) — Proitzen

Mar 2025 – Present

- Developed and maintained WordPress-based websites and features as part of the development team.
- Contributed 1 year 5 months of professional software development experience across client projects.

EDUCATION

BSc (Hons) in Computing and Information Systems

2022 – Aug 2026

- Sabaragamuwa University of Sri Lanka
- Undergraduate thesis: “Adaptive Jailbreak Benchmarking of Large Language Models” — AI safety research on adversarial evaluation of LLMs

G.C.E. Advanced Level (Physical Science Stream)

2020

- BT/Vincent Girls' High School — B, 2C's

RESEARCH & PUBLICATIONS

“Adaptive Jailbreak Benchmarking of Large Language Models” — Research abstract

- Accepted to iPURSE and APSURS (Undergraduate research symposia)
- Received the Best Presenter Award at APSURS

PROJECTS

Gemini Clone

Individual Project

- Front-end clone of Google Gemini's conversational AI interface.
- Technology: React GitHub

MERN Chat App

Individual Project

- Real-time chat application built on the MERN stack.
- Technology: MongoDB, ExpressJS, ReactJS, NodeJS GitHub

Blood Bond: AI-Driven Mobile App

Group Project

- Mobile application connecting blood donors and recipients in real time with personalized reminders and location-based matching.
- Role: Backend Developer — implemented Firebase authentication and integrated machine learning models for personalized matching and recommendations.
- Technology: React Native, Firebase, Python GitHub

PowerSaver Smart Energy Management App

Group Project

- Smart app for energy management providing real-time usage tracking, daily tips, and power-issue alerts.
- Role: Frontend Developer — built the UI in React Native, set up the project environment, and integrated real-time tracking features.
- Technology: React Native, Firebase, Python GitHub

TECHNICAL SKILLS

- **Frontend Development:** HTML, CSS, ReactJS, Angular, Bootstrap, Vue.js, Tailwind CSS
- **Backend Development:** JavaScript, PHP, WordPress, C#, .NET, Laravel, TypeScript
- **Databases:** MySQL, MongoDB, Firebase, SQL Server
- **Mobile Development:** React Native, Flutter
- **Programming Languages:** JavaScript, Python, Java, C, C#, TypeScript
- **Tools & Platforms:** Git & GitHub, GitLab, VS Code, Visual Studio, Figma, Trello, Adobe Photoshop, Adobe Illustrator, Android Studio

CERTIFICATIONS

- **Web Design for Beginners** — University of Moratuwa
- **Mobile App Development – Android App Development for Beginners** — Simplilearn
- **Introduction to MERN** — Simplilearn
- **Foundations of User Experience (UX) Design** — Coursera

ACHIEVEMENTS

- IDEALIZE'23 Finalist – Open Category
- IDEALIZE'24 Participant – Open Category
- Innovate with Ballerina'24 Participant
- Pearl Hack'25 Ideathon Finalist
- Code Quest'25 Finalist
- Best Presenter Award — APSURS

EXTRA CURRICULAR ACTIVITIES

- Member, IEEE Student Branch, Sabaragamuwa University of Sri Lanka
- Member, Society of Computer Sciences, Sabaragamuwa University of Sri Lanka
